

Reinhold Baer Prize

The no profit association

AGTA — Advances in Group Theory and Applications

and

Aracne Editrice

announce every year an international prize of € 1000 for a PhD thesis in group theory and its applications. The prize is dedicated to **Reinhold Baer** (1902–1979), great German algebraist who built an important school of group theory. The aim of the prize is to support the scientific activity of young researchers, regardless of their geographical origin.

The selection committee of the **2017 edition** consists of three members, which are nominated by the AGTA Council; the Committee selects the winner, and can additionally mention a second deserving candidate. Moreover, the Committee may decide not to award the prize, in case of absence of adequate scientific applications.

The **winner** of the 2017 edition will be announced during the international conference

Advances in Group Theory and Applications 2017,

which will be held in Lecce (Italy) since September 5th to 8th, 2017.
